

Pull out multi purpose basket Shearer 4.0

Installation manual

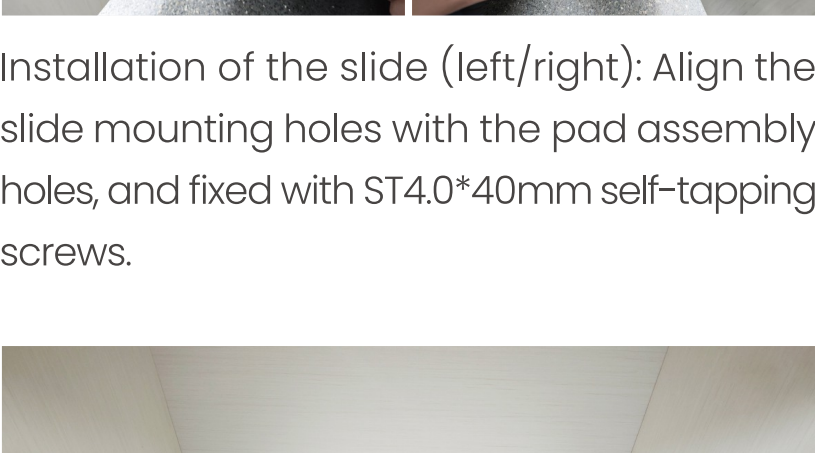

STEP - 01 -

Installation of the slide

Cabinet size	900	800	750	700	600
Hinge center distance	>770mm	>670mm	>620mm	>570mm	>470mm

Note: The installation height of the slide pads must avoid the cabinet door hinges. They should be installed at the bottom, with inner cabinet bottom should be at least 65mm away from the hinges. Additionally, the basket body is not compatible with cabinet doors using insert hinges (please refer to the hinge center distance specified above for details).

Using the bottom edge of the cabinet and the edge of the cabinet door as a reference, use the installation template to pre-drill holes (left/right).

Installation of 4 slide pads (left/right):Align the pad fixing holes with the pre-drilled holes, and fixed with ST4.0*16mm self-tapping screws.

Installation of the slide (left/right): Align the slide mounting holes with the pad assembly holes, and fixed with ST4.0*40mm self-tapping screws.

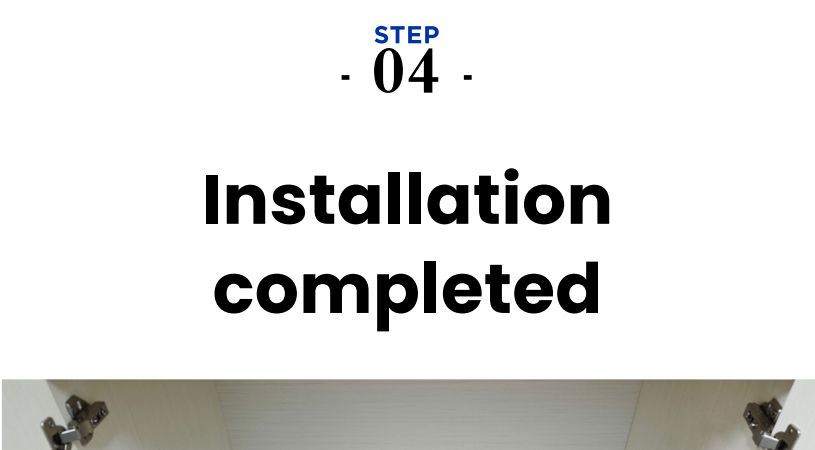

Slide installation completed.

STEP - 02 -

Installation of the Basket

Insert the tail hook of the slide into the rear groove (left/right) of the basket.

Align the U-shaped clips on the front end of the basket with the grooves of the slide, press down to clamp (left/right), and the main body of the basket installation completed.

STEP - 03 -

Installation of accessories

Clip the partition panels onto the dividing strips (their positions can be adjusted by sliding according to the product size).

Install the draining tray: Place the tray into the bottom slot until it is in place.

STEP - 04 -

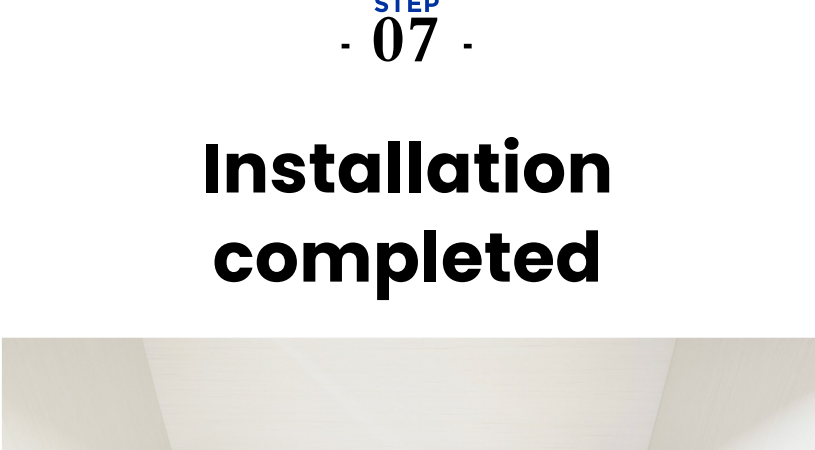

Installation completed

Basket installation completed.

STEP - 05 -

The Basket installation

The installation method of the slide is universal. Insert the tail hook of the slide into the groove (left/right) at the rear end of the basket.

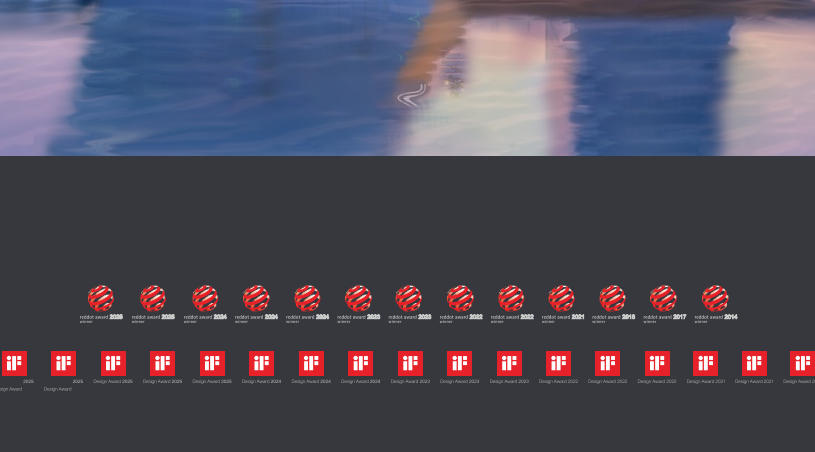

Align the U-shaped clamp at the front of the basket with the groove of the slide, then press down to make sure it is locked (Both left and right). The main body of the basket installation finished.

STEP - 06 -

Installation of accessories

Insert the divider strips at both ends, and snap the divider plate into the middle.

Install the water tray: align it properly and push it into the bottom slot until it clicks into place.

STEP - 07 -

Installation completed

Installation of the Basket is completed.

Note:

1. For the Basket Installations, attention to the installation dimensions to avoid interference during basket pulling.
2. When installing two basket in one cabinet, it is recommended to use the midline of the inner cabinet height as the reference for the upper layer installation, and pay attention to the interference of the upper hinges.
